Comments: Greetings,

Having fully read your Sequoia and Sierra National Forests Prescribed Fire Project (65081) documents, I am writing to say I am in agreement and in full support of your plans for prescribed burns in the areas you note.

I would also like to add that I and many of my friends regularly use enjoy these same lands, in particular the southern portions of the Forests and hope you continue maintain and keep open the off-road motorized trails, in particular the two wheel smaller trails all in and around the areas of the PCT. My friends and I are very respectful of the land and the trail and do not want to see closure of these important trails. More and more of us are being squeezed into smaller and smaller areas.

I feel the prescribed plans you are considering to implement will be healthy and beneficial to help maintain these public lands. I wish the SMMNRA would take notice of what you are doing and use similar practices there.

Thank you for your service and all the work you do.

Respectfully,

James Grasso
