Comments: Regarding proposed timber harvesting and other forest work in the Ferncroft area of Wonalancet NH: I am not opposed to the type of responsible timber harvesting the USFS oversees. In the instance of the Wonalancet Ferncroft project however I am concerned this project poses a significant conflict with the recreation resource which has becoming far more important there in recent years. Its hard to believe that usage of this road by logging trucks and equipment which passes through a highly used parking lot can be done without significant conflict with the recreation use and without creating a significant safety hazard. Please cancel or revise the plan to address these issues.
