Comments: i am totally opposed to this project. prescribed fire burning is horrific and does not achieve any objective at all. it brings 2.5ppm smoke into people lungs so it is polluting. it also harm;s the trees. teh trees know how to protect themselves.better you watch people and keep some of the fire starters out of the forest and get teh electric utilities out of our forests, because thelines they are putting in our forestt start fires by themsvelses. we have seen ths happen over and over again in california and hawaii. we need to stop allowing utilities to use our forest lands for teh free lines. let them put the lines along highways where we can watch themno more lines tythrough forests. that has been shown to be a firestarters. this plan is awful. throw it away. its about logging and trying to hideit. its about moneymaking not protecting tghe forest. birds and annals live in that forest. they dont need theirh omes destroyed. we side with them and nature. stop teh forest mauling by thishuman group looking for extra pay.
