Comments: I object to this project; stop cutting down so many trees in the name of progress.

There is too much at risk to our beautiful forests when the ecological cycle is tampered with.

I have lived in NH for over 25 years. I live in a wooded area where I used to be able to enjoy the night sky, in total darkness. Now, with shopping plazas, logging, new housing, etc. taking so many trees, I am no longer able to enjoy the night sky in total darkness, there is now light pollution. I used to be able to sit on my deck during the summer and enjoy the peaceful quiet of nature, I now hear the highway. The natural beauty, fresh air, and forests that drew me and so many others to NH, are slowly being destroyed.

It seems to me that cutting down almost 25% of the area this project encompasses would create a negative ecological impact and do more harm than good.
