Comments: I oppose the Sandwich Range Management Plan. This area depends on revenues from tourism. These forests are where they come to hike and enjoy the scenic views. This plan will cause tourists to go elsewhere and probably not come back. There is no benefit to the public. These forests should be allowed to grow old and be enjoyed by the public today and by future generations.

Why aren't there alternative plans that don't require destroying such a large area? Why do the forests have to be managed at all?
