Title:

Comments: I am in favor of the management practices outlined by the Forest Service, including all logging that will serve to keep this area of the National Forest healthy and maintained, as well as providing a revenue stream that is central to the mission statement of the National Forest Service "to sustain the health, diversity, and productivity of the nation's forests and grasslands to meet the needs of present and future generations"

Thank you to Jim Innis and the other Forest Service employees for holding interactive and informational public sessions to allow citizens to learn about the ongoing management practices. Unfortunately, mischaracterization and misinformation has been taken to the extreme and commonly encountered scare tactics have run wild, as with other topics in our modern society.

A managed forest is a healthy forest.
