Title: President

Comments: My understanding is that the emissions associated with the logging process can be quite large. Anecdotally I heard that in 2018 the CO2 emissions associated with logging equipment were the single largest source of CO2 emissions in the State of Oregon. I would like to see a portion of the timber sale set aside for contractors who would implement low impact logging practices such as those described in Mitch Lansky's book, "Low Impact Forestry, Forestry as If the Future mattered".
