Title:

Comments: Recommend that if/when implementing this permitting process that you have separate permit numbers for human powered: hiking/biking/horses versus machine powered: ORV/ATV/4X4. The impact on the trail system is different from the different groups. Also increase the fine if you request a non-motorized pass and you are in a motorized vehicle. Additionally, recommend a rolling system whereby 50% are released 6 months in advance, 25% of the remaining are released a month in advance and the remaining 25% are for walk up.
