Comments: Dear GMUG,

I am strongly IN SUPPORT of your proposal to limit visitor travel to Blue Lakes. When I hiked there this summer, the trail was crowded and it was necessary to weave through campsites at the lower Blue Lakes to reach the shore.

A critical concern is human waste. It is essential that at least one pit toilet be installed at the lake and another at the trailhead.

I think that camping should be by permit only and in designated campsites only.

Limiting the numbers of hikers each day is also a good idea.

Thank you for your efforts to protect our forest recreation.
