Comments: I strongly support any and all measures to manage and or restrict use of the Blue Lakes trail and region. I have hiked the trail several times and the difference between 5 years ago and this year is heartbreaking. This year there was trash and evidence of human waste along the trail and especially at the camping area near the lake. It really spoils the outdoor experience.

While a permitting system would make day or overnight camping a little more cumbersome I believe it is the right thing to do.
