Title:

Comments: This land exchange should not have happened in the first place

It is not in the best interest of public land ownership or the state of Montana. Land in the YC that were put into public ownership were already in a conservation easement with Montana Land Reliance. The private land , now public is mostly rock and screw and really had.no use for the YC.

Now, another area will be developed by the wealthiest in America for their private recreation.

Why does this happen on public lands that belong to all of us?

Leslie Stoltz
