Comments: I oppose allowing e-bikes in Teton Pass

1. They're motorized, there's no getting around this fact, no ICE (motorcycles) no electric motors (e-bikes)
2. The closing speed of a motorized bike with on coming traffic on single track in wooded areas is a guarantee of injury and conflict. 20 MPH in both directions = 40 mph, no way is there the line of site needed for this closing rate on most trails on Teton pass.

I am a regular user of the pass trails and as I get older and no longer have the fitness to ride the trails I will find less taxing trails and pathways to ride, and when I feel the need to recreate on the pass I'll hike or walk. Reality check, life's not always fair!!
