Comments: E-bike use on local single track trails is a TERRIBLE proposition. I firmly oppose this. Please consider the already hazardous situation on bike paths posed by e-bikes. This scenario worsens exponentially on single track trails, especially on technical trails where regular mountain bikes are much slower. There will certainly be more accidents and trauma on single track trails if e-bikes are added to the equation. In addition, wildlife concerns are huge. E-bikes are essentially electric motorcycles, and have no place on multi-use trails, where hikers and mountain bikes abound.

Thank you.
