Comments: I would like to comment on the e-bike usage on national forest land. Being an avid e-bike user, having access to these trails would be wonderful, however, the types of e-bikes to be used should be defined. Not all e-bikes are the same and are ranked in classes. In my opinion, only class 1 and 3 e-bikes should be allowed. These have no throttle therefore you must pedal and speeds are limited.

I must also comment that with e-bikes the trails will be available for more people to enjoy like myself. I ride e-bikes due to health issues so it opens up an opportunity for more people like myself to enjoy these wonderful trails.

Respectfully,

Justin Grady
