Comments: Regarding the proposed change to allow class 1 e-bikes on 27.5 miles of currently non-motorized trails on Teton Pass, please recognize these trails are and have been non-motorized trails for good reason and regardless of class 1, 2 or 3, e-bikes are motorized. Therefore please reject this proposal and continue to allow non-motorized trails to remain non-motorized and allow motorized e-bikes, regardless of class, to utilize existing motorized trails. Let us draw the line in the simplest, most logical place and avoid the slippery slope of starting to allow "some" motorized travel on our non-motorized trails simply because of the increased popularity of e-bikes. Thank you.
