Comments: Hi there, I strongly oppose allowing e-bikes on our trail systems! The trails can already be crowded with runners and mountain bikers, and interactions between those two groups are not always the most positive. I myself am a mountain biker and always yield to runners but with many runner friends, I know that not all mountain bikers to yield to people on feet. My big fear is that with e bikes zipping past people and coming up on people so fast, these trails will no longer be comfortable for people on feet! I also think many people get into nature to get away from motorized devices and this would take away many people's sanctuary!

Please do not allow e bikes on our trails.
