Comments: Hello,

I feel that with increasing use and development of the technology occurring quickly we need to slow down with e bike access. Where will we be when e skis or models, scooters etc begging being used. I also feel there is a bit of a change in the nature the areas are used with e-bikes. A striking example is the the nature of the pathways and the challenges we face with them have occurred. Once you allow e bikes they will never be a reversal and those who e bike don't go bike to human powered bikes and thus you permanently change the nature of the trails once e bikes are permitted
