Title:

Comments: I support the use of e-bikes on the trails of Teton Pass. This will encourage more people to spend time outdoors. Making the forest more accessible to more people will create a larger population of advocates for BTNF. The infrastructure (parking at trailheads and trails) already need upgrading (in particular the parking at the top of the pass) since they are overcrowded and should be enlarged to accommodate more people and improve accessibility of these public treasures to a larger portion of the local population and visitors.
