Comments: Hello folks-

Thanks for taking comments. I am against permitting e-bikes on our Teton Pass trails, which are already crowded enough. E bikes go too fast! Here are some further comments:

- 1) greater congestion at trailhead and on trails,
- 2) impacts to wildlife,
- 3) more accidents,
- 4) a lack of enforcement to regulate the type of e-bikes used,
- 5) more user conflicts, with the impacts of e-bikes primarily on non-motorized backcountry travelers, and
- 6) the implications an e-bikes decision on future modes of winter backcountry travel.

Together these impacts will transform Teton Pass and change users' experience significantly.
