Title:

Comments: I am writing you in agreement to the prescribed burn.

We wouldn't have such uncontrollable fires, if allowed to clear dead forage and in turn would save water and chemicals to put fires out and actually promote new growth of our ancient Redwoods. Stop listening to these (so called) environmentalists who know nothing about what's best for our beautiful and beloved forest. They are not reasonable people and lack common sense.

Thank you for this opportunity to provide feedback.
