Comments: I strongly oppose any type of e bike on mountain bike trails. It would especially be unsafe for multi use trails which I also hike and bike on. The trails currently show hard use from what we already do to them. I personally was hit broad sided by a person on an e bike who did not know how to use the brakes properly and failed to yield at a yield sign, thus running into me. I sustained multiple cuts and bruises and my road bike was trashed. Let the e bikes use the dirt bike tracks and trails they are after all a motorized vehicle.
