Comments: I strongly oppose to any allowance of e-bikes on single track trails. I feel that by allowing e-bikes on trails it will potentiate the degradation of the trails. It would also increase trail traffic putting others recreating on the trails at risk for dangerous encounters. An e-bike is essentially a "motorized vehicle" with capacity to reach speeds of 30 mph or greater. Imagining the potential injuries to our community members if an e-bike where to lose control or collide with a fellow recreational user is a situation we are capable of avoiding by not allowing e-bikes on trails.
