Comments: I would like to make sure that the Powers wall & waterfall area remain open to both climbing and hiking. The trail is unfortunately directly up, and the number of folks hiking up has caused some erosion. But a longer trail - less direct with more switchbacks would alleviate that issue. It is a great spot to have a pit toilet or two!

I love the additional parking for mondo beyond. I am curious how you will determine new routes (developed since 2019) for removal? Many developers never posted their routes, or did so many years after development.

Also if you plan to close camping in the 1.5 mile western stretch of the old hwy- where do you want those folks to camp? Pit toilets should be installed wherever you send them. Also a pit toilet up at Crag 6.
