Comments: I'm writing to comment on E-Bike Use Designation on Select Jackson Area Trails #64890. I oppose allowing E-bikes on the trails of Teton Pass, either north or south of Highway 22. I believe allowing E-bikes on the trails indicated will lead to increased congestion on already crowded trails and trailheads. I believe that increased congestion will negatively impact both the user experience and wildlife.

I also believe that it will lead to more accidents on those trails, which will lead to more rescues and increased impacts on the landscape, including on wildlife.
