Comments: I'm in favor of allowing e-bikes on the pass - and even more areas in the future. Having spent time in Europe, there isn't an option to not have e-bikes allowed, and the variation of ages and people that have greater access to cycling because of the advent of e-bikes.

Additionally incredibly fit people I know have actually had to adjust to utilizing e-bikes due to health issues - and e-bikes have created the opportunity for them to keep riding. I realize that it feels 'untrue' to the sport, but creating an arena to allow this and it really creates a different type of riding, you can increase your distance dramatically yet still get a workout, and it keeps shuttles and extra vehicles off the road too. As for issues with horses - which I also love to ride and support, they do technically get most of the park too, where cyclists are limited.

Thanks for helping to make this happen!
