Comments: I do NOT want ebikes on trails. I think standard bikes and hikers provide enough conflicts. Ebikes will only add to problems. As an older hiker and biker, I appreciate the increased options ebikes give me to make trails easier to navigate. However, I am concerned that enforcement of Type 1 will be difficult. In particular, how do you enforce USFS rules on bicycle shops, if they're the ones providing the stickers? I feel too many people will be able to evade the rules and ruin the trails for everyone.
