Comments: Please do not allow e bikes on any of the forest service trails. It will totally change our system forever if it is allowed. All ebikes should stay on paved pathways where the county has been building them throughout our entire community. I am a horseback rider and it is already difficult to find anywhere to ride that there are not encounters with bicycles especially mountain bikers on the trails that are in question. Most of these trails were started by horseback riders myself included 30 years ago and now I cannot ride without taking my life and horse in danger with the fast bikes coming at me in both directions. Jackson hole is no longer the last of the West. It is already gone. Giving bicycles a preference over horses on these trails is just another example.
