Comments: I am so excited you are considering allowing e-bikes on trails on a limited basis in the Tetons! Trail systems from British Columbia to Europe to South America have allowed e-bikes with no negative outcomes. E-bikes allow more usage of trails for working-class people (you are exhausted from a long day's work and an e-bike gives you enough boost to tackle the trail) and people with physical challenges (you are a 50 year-old woman with MS or a teenager with a muscular degenerative disease).

E-bikes are the wave of the future. It's smart of Teton County to acknowledge this and get ahead of the curve.

Thank you!
