Comments: I am against allowing ebikes to utilize the bike trails that you have designated. It will enable those that wouldn't otherwise be capable of riding those trails to be able to do so and will create too much congestion on the bike trails. This could also potentially interfere with wildlife. I also foresee more people needing assistance once the battery on their e-bike runs out. In an ever changing world, it is preferable to keep this region of the country more serene and natural. I firmly believe that ebikes should have no part in our community.
