Comments: Class 1 e-bikes allow users who would be otherwise restricted to enjoying the outdoors on bike, ACCESS to these trails. There is no evidence that a class 1 e-bike does any more trail damage than a traditional mountain bike. Latest versions of class 1 bikes are also almost as quiet as a traditional MTB. Yes, they should be allowed, just like those of us who ride traditional bikes on these trails. The views, the proximity to nature, and the overall experience possess healing powers that few get to experience in this world, but that we ALL need.
