Comments: I am against the use of e-bikes. They have made the bike paths around town more dangerous and that is exactly what I believe will happen on the trails. But the trails are not as forgiving.

I have ridden trails in other places that allow e-bikes and I have been forced off the trail by them. It is not safe.

Mnt biking is already a challenging, athletic sport that requires a lot of energy and focus. I don't want to now have to add the element of being concerned about e-bikers on the trail.

They come up behind you super fast on an uphill where you are pushing hard and out of breath and expect you to get out of their way. Not only is that rude and unfair it's also dangerous.
