Comments: As a member of the FWP region 4 Citizen Advisory Committee I fully support the comments of PLWA, Public Land Water Assn. The USFS proposal is a "taking" of a public right & asset. Access is a right and an asset. If access was not an asset then there would be no need to exchange money for easements. There needs to be a full economic assessment of the value of any "access" being exchanged or abandoned. The public has a right to know the economic value of what they are giving and the economic value of what they are getting.
