Comments: I oppose e-bikes on nonmotorized trails in USFS. E-bikes have motors and are a very different experience than analog bicycles. If we allow e-bikes, wouldn't we also have to consider all the other e-mobility devices that currently exist? Devices like electric scooters, one-wheels, off road electric skateboards would want to be included as well. I don't believe those uses are compatible with the current user groups, like hikers and equestrians. Trail conflict is a very important consideration when discussing e-bikes and other e-mobility devices. Lets keep motorized use on motorized trails.
