Comments: Please consider allowing at least class one pedal assist e-bikes on the trails where mountain bikes are allowed. I am a 63 year old woman, wife and grandmother. I am a retired IT corporate professional, and the treasurer of our local bike and community trails organization. I have been an avid road and mountain bike rider and trail building volunteer for over 40 years. Due to health issues in my 60's I now ride an e-bike. It has literally given me a new lease on life and allowed me to ride with family and friends again. From my years of trail building and maintenance, I see no difference in impact to trails from riding a non e-bike versus my pedal assist e-mountain bike. Thank you, Paula
