Comments: As a property owner in the concerned area, I am concerned to see that as part of this project more roads are being proposed to be closed. We Liberty area property owners and the many recreators using this area went through one round of this (approx 12-14 years ago) and it eliminated many of the important routes we regularly used. Too many roads have been closed already.

I also am having a hard time reading your map of road closures, or determining what is intended by roads marked green. The legend for green color says "Open Road", though there is no clear definition of what that means to those of us that are interested in having more roads for motorized use. The problem with viewing the map seems to be mainly it's clarity and resolution.

I would like to see some of these project funds get used for restoring the condition of heavy traffic roads such as Pine Gulch. That road and many others have continually degraded from erosion, lack of annual maintenance and continual use. The roadside tree and shrub growth has choked many of the roads and decreased the visibility and fire safety.

With the steady and significant increases in 4x4 and trail motorcycle recreation in this area, the greatest need on the public use side is road/trail maintenance and opening of new or previously closed roads/trails. I hope these thoughts are useful and can be used constructively.
