Title:

Comments: I oppose the exchange as it benefits the Yellowstone Club. The Yellowstone Club is responsible for the destruction of Gallatin Gateway. The proposed gravel pit on critical elk habitat in Gallatin Gateway is intended to provide for needs in the Club and Big Sky. Yes, let's stick it to Montanans to help uber wealthy out of state people who spend two weeks a year in the Yellowstone Club. And, let's also mention the Club (and/or affiliated owners) who are now scarring the southern Crazies landscape by developing the Crazy Mountain Ranch for a handful of wealthy people.

Start managing public lands for the public, not for robber barons.
