Title:

Comments: As a citizen of Wyoming, I am strongly opposed to reversing the present ban on producing "manufactured" routes of permanently placed climbing aids in Ten Sleep Canyon. Climbing in the Canyon should be limited to use of temporary, removeable aids which do not damage the rock surface after the removal of present damaging aids. Allowing unregulated placement of permanent aids would result in placement of unlimited aids all over the rock face degrading the climbing experience of future climbers.

Thank you for your consideration of my opinion.

Werner Studer
