Comments: Please do not allow logging in the WMNF. A lot has changed since the 2005 plan was generated and we need to do all we can to store embodied carbon in our forests and to protect our fragile ecosystems that are currently in peril. Saying that there will be no significant impact to the environment is inadequate; it will certainly be impactful, and that is enough to reject this consideration. Mature forests need to stand, and you need to stand up for them.

Thank you for your time and consideration.
