Comments: While I recognize that fire has played, and continues to play, an important ecological role in these Wildernesses, the Forest Service proposal represents a huge human-driven manipulation of Wilderness that is inconsistent with the letter and spirit of the 1964 Wilderness Act. From a wilderness perspective, it is far better to allow natural, lightning-caused fire to play its role, rather than to invade Wilderness to cut down "undesirable" trees and burn forests based on human wishes and desires
