Comments: Dear Madam or Sir,

I was disturbed to hear of your plan to burn Sequoia and Sierra National Forests in California that covers 2.4 million acres-including all 842,448 acres of Wildernesses in both national forests!

The agency should instead allow natural, lightning-caused fire to play its ecological role in Wilderness on the Sequoia and Sierra National Forests. There has always been a natural order of nature. Let it take care of itself. It will you well know.

Thank you.
