Title:

Comments: Dear Forest Service,

I oppose the proposed burning plan that would impact over 842,000 acres of wilderness, as it is misguided and inconsistent with the spirit of the 1964 Wilderness Act. It is much better to allow natural, lightning-caused fire to play its ecological role.

Please exclude all the designated Wildernesses from its proposed burning plans for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act. Some of America's most loved Wilderness areas are at stake, and are irreplaceable.

Thank you.

Tom Sullivan
