Title:

Comments: Please consider the following as most things done by humans don't have the desired effect. Our Wilderness areas should stay completely wilderness. Lightning is a natural factor and we should let nature take her course.

If a fire is human caused, that person should be held fully accountable incl. prison sentence.

The Forest Service should exclude all of the designated Wildernesses from its proposed burning plans for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act. Some of America's most loved Wilderness areas are at stake, including the Ansel Adams, Dinkey Lakes, John Muir, Kaiser, Kiavah, Monarch, South Sierra, Dome Land, Jennie Lakes, and Golden Trout Wildernesses.

The agency should instead allow natural, lightning-caused fire to play its ecological role in Wilderness on the Sequoia and Sierra National Forests.
