Comments: I think burning the National Forests in the Sequoia National Park and the Sierra Nevada National Forests should be a crime. We lose enough of our forests to natural fires. I grew up camping and spending holidays and summers in these forests! I think purposefully burning these ecosystems is a horrible idea. I strongly oppose a purposeful burn of our Natural treasures! It makes me want to cry! Please do not destroy Mother Nature's gifts. Changing our natural ecosystems will destroy the balance of nature for our entire planet!
