First name: Callie

Last name: Willis

Organization:

Title:

Comments: I'm really losing faith in the US Forest Service. The organization seems to consistently run counter to what's actually good for forests. Sometimes it's cutting old growth forests that are our greatest carbon sequesters. Other times it's cutting and burning areas that would just benefit from being left alone and this is one of them. Let's look for ways to help the forests in this country - not chop and burn them up.
