Comments: LET NATURE DO IT. I write to protest the US Forest Service proposal to implement a massive burning in those areas of the Sierras that are listed as wilderness. To do so would violate the Wilderness Act by pursuing a human-generated solution to human-engendered climate change. The best solution is the one already in operation: allow wilderness to be ignited by nature itself. If it was going to be done at all, it needed to be implemented decades ago, and again by letting natural conflagrations do the work.

Thank you for your attention.
