Title:

Comments: Our family has had a cabin in Pinecrest since 1947. I have watch the forests in the area get overly dense for many years.

So I highly support the effort to thin and manage the forest by whatever means is appropriate (thinning, selective logging, controlled burns, management of lightning cause fires, etc.) towards the aim of:

1. Reducing the risk and impact of catastrophic fires.
2. Increasing forest health.

This effort should be given top priority by the Forest Service.
