First name: Dylan

Last name: Lockard

Organization:

Title:

Comments: Please do not look to make climbing less accessible in public lands. Fixed anchors make climbing safer and have minimal to no impact on the natural landscape. Utilizing your resources to fight littering instead would actually benefit everyone. A proposal that could result in removing climbing anchors helps no one and wastes resources that are already very limited in environmental protection. The climbing community is very respectful of the natural landscape and represents good stewards of the environment.
