Comments: The section about fixed anchors is a scary thought. If you try to start taking down or removing fixed anchors, this will be very unsafe for all climbers. Including my family and I. My wife, 8 year old son, and I love to get outside and enjoy the wilderness and do some easy rock climbs. And if you remove the fixed anchors, we wouldn't be able to climb safely. Please discuss all of this with the access fund to find a solution that still allows for our safety. I know you are trying to preserve nature, and climbers are so helpful with the cause. We want our nature to remain beautiful for every generation to get to explore like we do. So let's work together on this. But please don't make it unsafe for us by taking away our fixed anchors.
