Title:

Comments: nts:Climbing in National Parks and Forest Service land is a special privilege. We would love to work together to find a solution to make climbing available and not limited. We want to respect the wilderness in our approach and work together with public land agencies. Please work with the Access Fund to create a sustainable climbing management plan that will help protect public lands and still make climbing available to us now and in future generations. There are stories that need to still be lived out!
