Comments: To whom it may concern.

I applaud the efforts you all have put in towards making a climbing management plan.

I am concerned that there will be more restrictions with route development. And that the language may make it mandatory for developers to request access before developing routes. This would surely slow down development work.

I am also concerned that routes will be removed in the Leigh creek natural area. Maybe we can limit new route developement there but keep the old ones.

Thanks for your time

Bria
